Background (1)

LINGUISTIC ANNOTATION STANDARDISATION (ISO TC37 SC4)		
Linguistic Annotation Level	Related ISO standard	Related terms/concepts
Level-independent	LAF/GrAF (ISO, 2008a)	LINGUISTIC ANNOTATION, STAND-OFF ANNOTATION , ANNOTATION ENCODING, XML , RDF , OWL , etc.
	DCR/ISOCat (ISO, 2010)	DATA CATEGORY, ONTOLOGY , FEATURE , etc.
	LMF (ISO, 2008b)	NLP LEXICON, MACHINE READABLE DICTIONARY, INFLECTED ENTRY, MORPHOLOGICAL PATTERN, LEMMA, etc.
Morpho-syntactic annotation	MAF (ISO, 2008c)	NOUN, GENDER, MASCULINE, etc.
Syntactic annotation	SynAF (ISO, 2006)	SENTENCE, PHRASE, CONSTITUTION, DEPENDENCY, etc.
Semantic annotation	SemAF/Time (ISO, 2007)	EVENT, EVENT STRUCTURE, TEMPORAL RELATION, etc.
	SemAF-NE (ISO, 2010)	NAMED ENTITY, SEMANTIC TYPE, ORGANIZATION, etc.
	SemAF-DS (ISO, 2010)	DISCOURSE UNITS, COHERENCE RELATIONS (basically).
	SemAF-Dacts (ISO, 2009)	DIALOGUE, TURN, DIALOGUE ACT, etc.

- Level-dependent standards do not benefit from a comprehensive and holistic view of their annotations
- So it is difficult to define a common annotation scheme or meta-scheme.

What is an ontology?

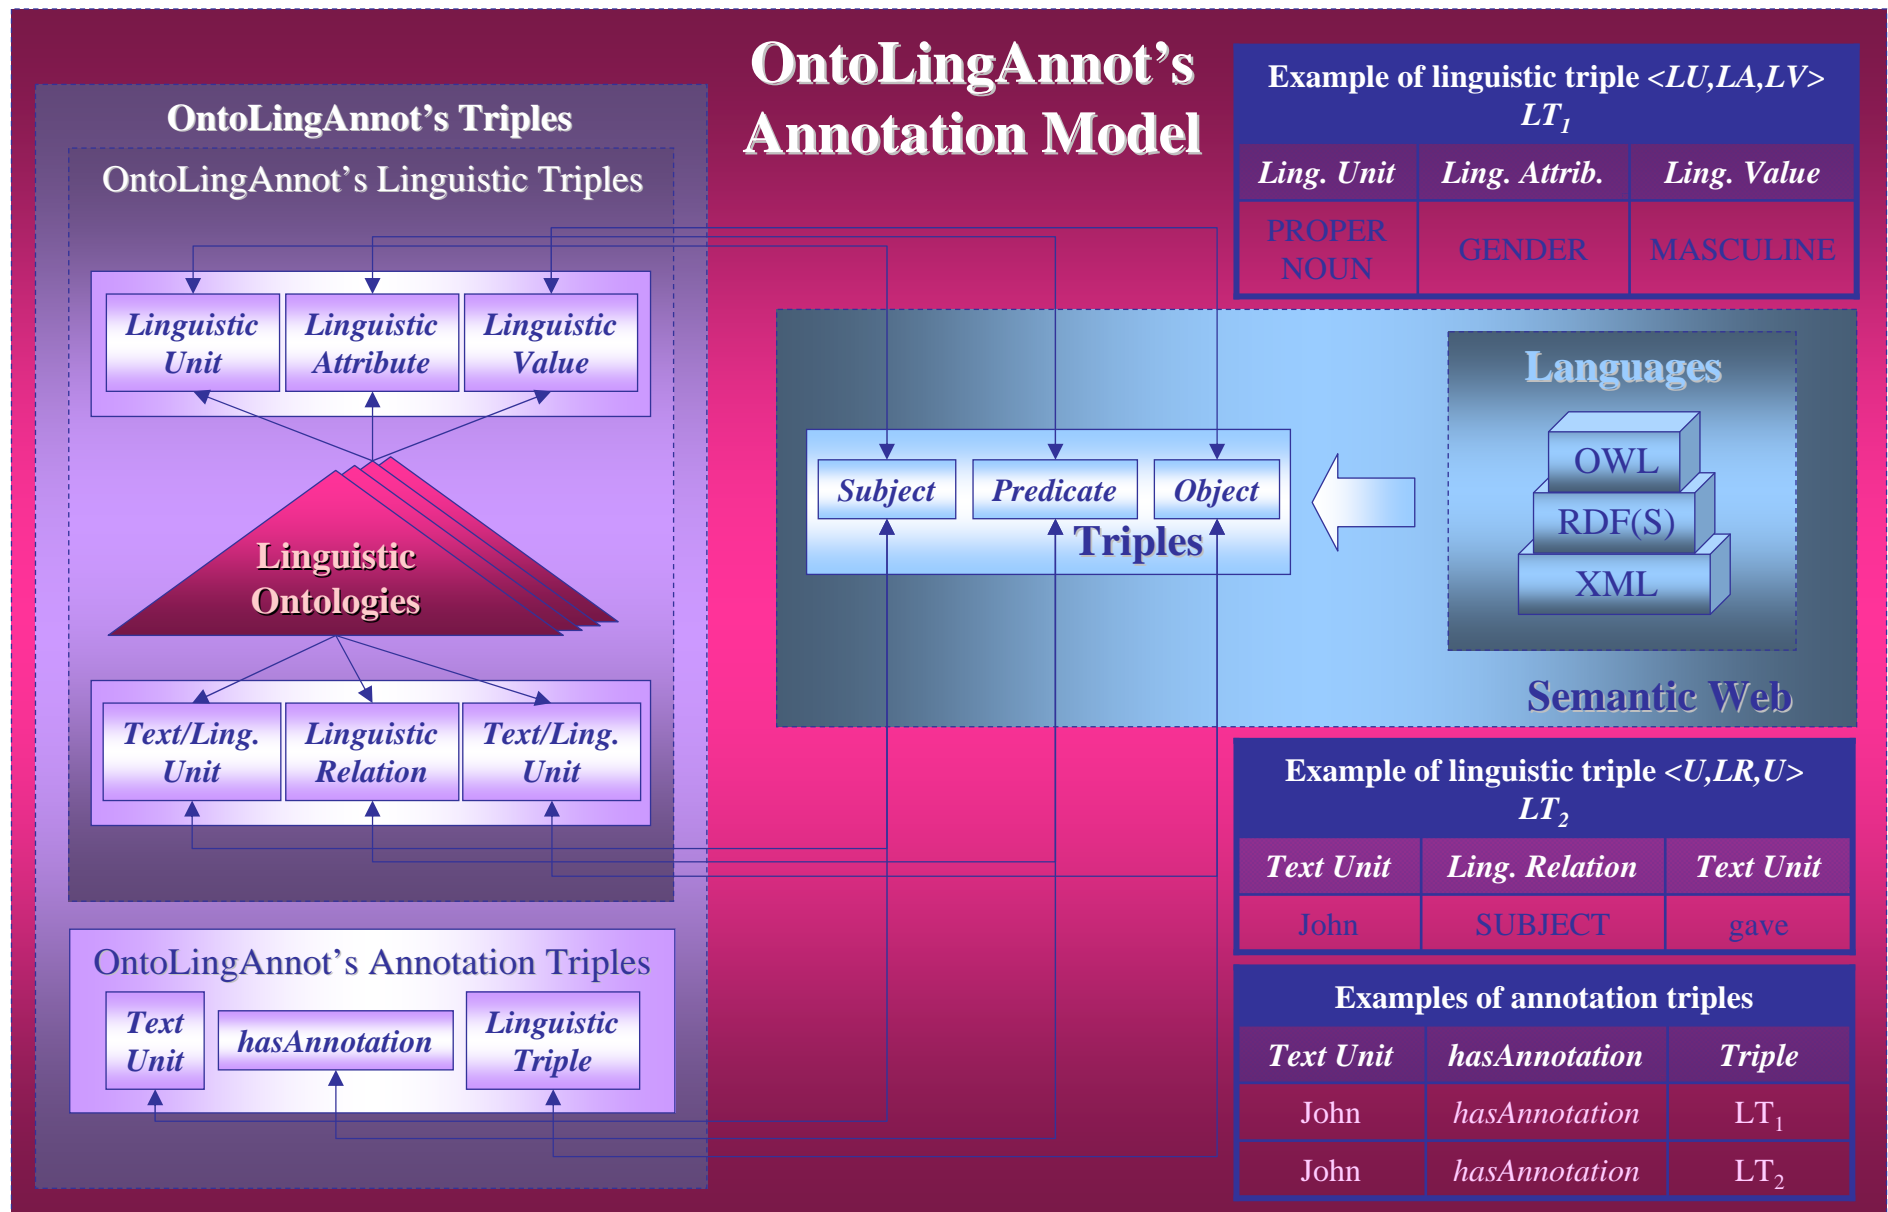

An ONTOLOGY is:

a formal (and explicit) specification of a shared conceptualization

The Linguistic Level Ontology (LLO): main **annotation levels**

LEVEL	ANNOTATION SCOPE	UNITS
Morphology	Up to word structure and meaning (including morph-related annotation).	<ul style="list-style-type: none">• Morph• Word
Syntax	Up to sentential structure (including multiword token, phrasal and clausal structure).	<ul style="list-style-type: none">• Token• Phrase• Clause• Sentence
Semantics	Up to propositional structure and sentence meaning (including phrase and clause meaning), that is, propositional meaning.	<ul style="list-style-type: none">• Sense• Proposition, etc.
Discourse	Up to discourse structure (including coherence relation-based structure) and the supra-sentential and locutionary meaning of texts and speech (including anaphora resolution).	<ul style="list-style-type: none">• Macroproposition• Turn, etc.
Pragmatics	Up to the illocutionary and perlocutionary structure and meaning of texts and speech (including deictic resolution and other pragmatic relation annotation).	<ul style="list-style-type: none">• Macroproposition• Pragmateme, etc.

The LLO: common **processes** (the **annotation layers**)

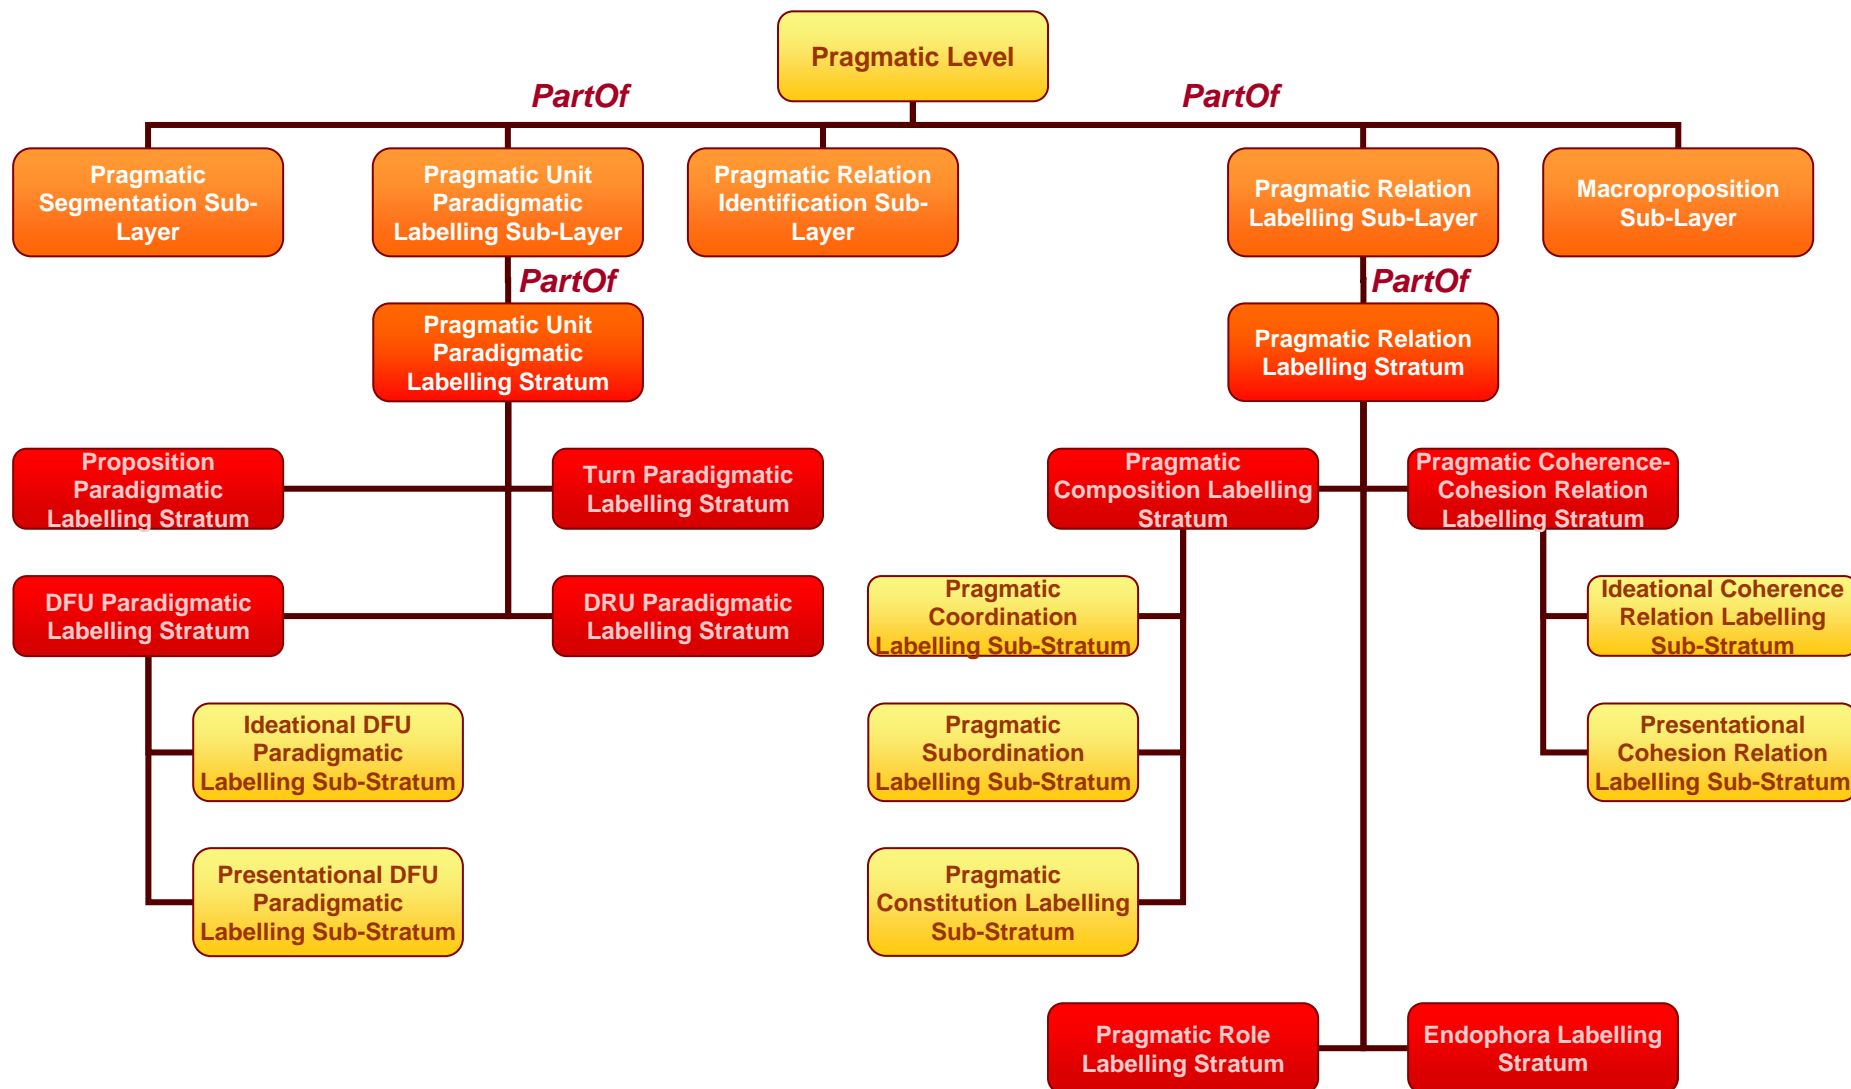

The LLO: annotation sub-layers

LAYER →	SEGMENTATION (CONSTITUENT UNIT RECOGNITION)	CONSTITUENT UNIT PARADIGMATIC LABELLING	SYNTAGMATIC RELATION IDENTIFICATION	SYNTAGMATIC RELATION LABELLING	RESULTING UNIT DETERMINATION
LEVEL ↓					
MORPHOLOGY	Sub-Layer 1.1: Morph Recognition (Morphological Segmentation)	Sub-Layer 1.2: Morph Paradigmatic Labelling	Sub-Layer 1.3: Word Formation Relation Identification	Sub-Layer 1.4: Word Formation Relation Labelling	Sub-Layer 1.5: Word Sub-Layer
SYNTAX	Sub-Layer 2.1: Syntactic Segmentation	Sub-Layer 2.2: Syntactic Unit Paradigmatic Labelling	Sub-Layer 2.3: Syntactic Relation Identification	Sub-Layer 2.4: Syntactic Relation Labelling	Sub-Layer 2.5: Aggregated Syntactic Unit Sub-Layer
SEMANTICS	Sub-Layer 3.1: Semantic Segmentation	Sub-Layer 3.2: Semantic Unit Paradigmatic Labelling	Sub-Layer 3.3: Proposition Formation Relation Identification (Predication Identification)	Sub-Layer 3.4: Proposition Formation Relation Labelling (Predication Labelling)	Sub-Layer 3.5: Proposition Sub-Layer
DISCOURSE	Sub-Layer 4.1: Discourse Segmentation	Sub-Layer 4.2: Discourse Unit Paradigmatic Labelling	Sub-Layer 4.3: Discourse Relation Identification	Sub-Layer 4.4: Discourse Relation Labelling	Sub-Layer 4.5: Macroproposition Sub-Layer
PRAGMATICS	Sub-Layer 5.1: Pragmatic Segmentation	Sub-Layer 5.2: Pragmatic Unit Paradigmatic Labelling	Sub-Layer 5.3: Pragmatic Relation Identification	Sub-Layer 5.4: Pragmatic Relation Labelling	Sub-Layer 5.5: Aggregated Pragmatic Unit Sub-Layer

[TAXONOMY & CLASSES]

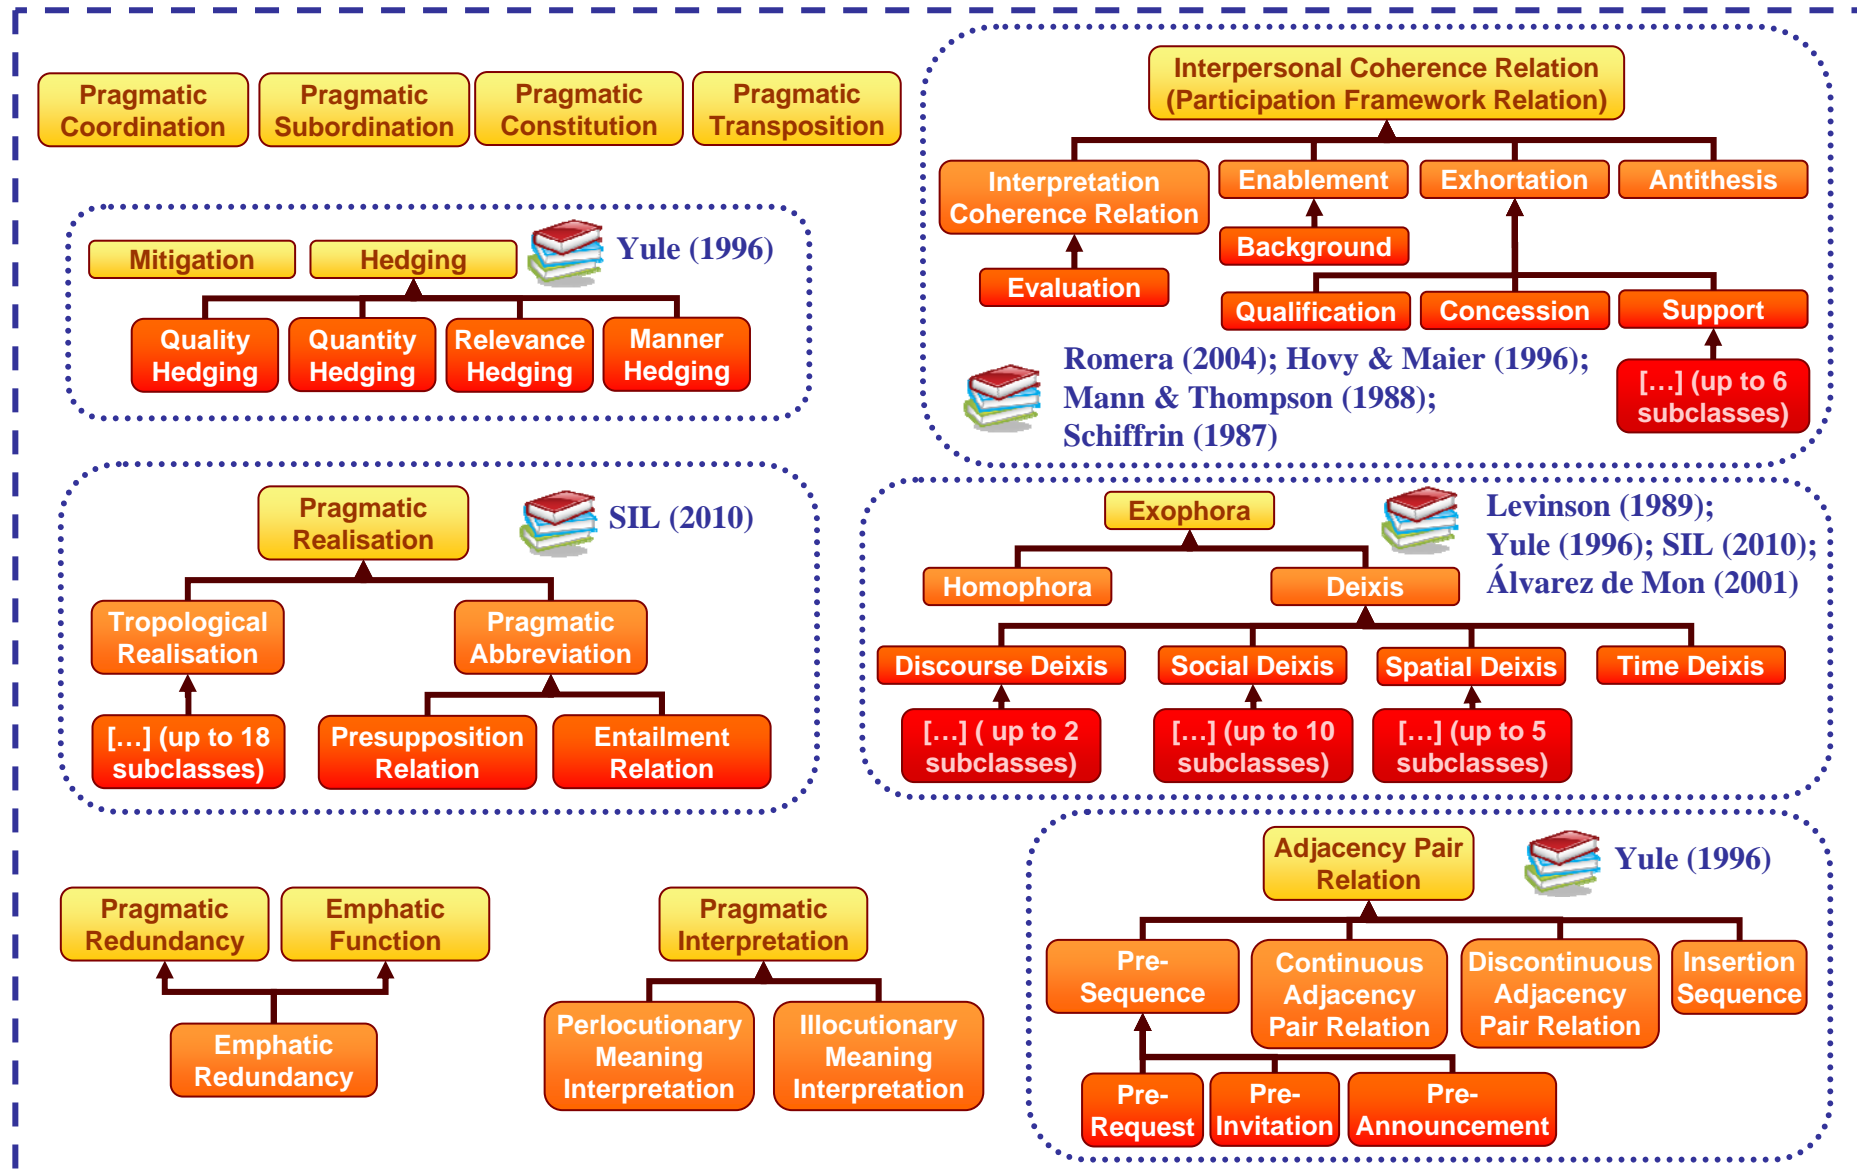

The pragmatic values in the Linguistic Value Ontology (LVO)

[INSTANCES]

CONCEPTS	INSTANCES
Common Pragmatic Value	{UNMARKED, MARKED}
Indirect Speech Value	<i>BOOLEAN</i> = {TRUE, FALSE}
Performative Type Value	{EXPLICIT, IMPLICIT}
Face Value	{SAVING, THREATENING, UNMARKED}
Mitigating Device Value	<i>BOOLEAN</i> = {TRUE, FALSE}
Addressing Type Value	{UNMARKED, OFF_RECORD, ON_RECORD, BALD_ON_RECORD}
Position Markedness Value	{UNMARKED, SUBINDEX, SUPERINDEX}
Format Markedness Value	{UNMARKED, UNDERLINED, ITALICS, BOLD, CAPITALISED, SMALL_CAPITALISED}
Size Markedness Value	{UNMARKED, BIGGER, SMALLER}
Style Markedness Value	{UNMARKED, SUBTITLE, TITLE}
Colour Markedness Value	{UNMARKED, MARKED}

CONCEPTS	INSTANCES
Register Markedness Value	{UNMARKED, FAMILIAR, SLANG, FORMAL, JARGON, TECHNICAL, OFFICIAL}
Politeness Markedness Value	{UNMARKED, POLITE, UNPOLITE}
Abbreviational Markedness Value	{UNMARKED, EXPECTEDLY_ABBREVIATED, UNEXPECTEDLY_ABBREVIATED, EXPECTEDLY_NON_ABBREVIATED, UNEXPECTEDLY_NON_ABBREVIATED}
Appreciative Markedness Value	{UNMARKED, AUGMENTATIVE, DIMINUTIVE, PEJORATIVE}
Preferential Markedness Value	{UNMARKED, PREFERRED, DISPREFERRED}
Proximity Value	{CLOSE, INTERMEDIATE, DISTANT, UNMARKED}

Pragmatic relations in the Linguistic Relationship Ontology (LRO)

Some Pragmatics-related statistics of OntoLingAnnot's ontologies

PRAGMATIC TERMS IN ONTOLINGANNOT'S ONTOLOGIES						
	UNITS (LUO)	ATTRIBUTES (LAO)	VALUES (LVO)	RELATIONS (LRO)	LEVEL, LAYERS, etc. (LLO)	TOTAL PRAGMATIC TERMS
CONCEPTS	192	10	27	86	24	339
INSTANCES	0	16	54	0	0	70
TOTAL TERMS	192	26	81	86	24	409

- There are also several other ontological terms concerning pragmatic (*attributes*, *SubclassOf*, *PartOf* and *ad hoc relations*, *rules* and *axioms*) not mentioned here for the sake of brevity.

Conclusions (1)

CONTRIBUTIONS REGARDING LINGUISTIC ANNOTATION AND STANDARDISATION

	LAF/ GrAF (ISO, 2008a)	DCR/ ISOCat (2010)	LMF (ISO, 2008b)	MAF (ISO, 2008c)	SynAF (ISO, 2006)	SemAF				Onto Ling Annot
						Time (ISO, 2007)	NE (ISO, 2010)	DS (ISO, 2010)	Dacts (ISO, 2009)	
Dialogue/discourse segmentation	-	MINIM.	-	-	-	-	-	PARTIAL.	PARTIAL.	YES
Turn definition and management	-	MINIM.	-	-	-	-	-	-	YES	YES
Speech acts	-	MINIM.	-	-	-	-	-	-	YES	YES
Other pragmatic units	-	-	-	-	-	-	-	-	-	YES
Pragmatic constitution, adjacency, etc.	-	-	-	-	-	-	-	-	-	YES
Mitigation / hedging	-	-	-	-	-	-	-	-	-	YES
Pragmatic cohesion/coherence	-	-	-	-	-	-	-	-	-	YES
Exophora / deixis	-	-	-	-	-	-	-	-	-	YES
Other pragm. relations	-	-	-	-	-	-	-	-	-	YES
PRAGMATIC ANNOT.	-	-	-	-	-	-	-	-	PARTIAL.	YES

- **OntoLingAnnot,**
 - gives a **holistic and uniform view** of linguistic annotation levels;
 - could be regarded as a perfect **complement to LAF/GrAF** (ISO, 2008a).

Conclusions (2): other relevant contributions

- We have presented the ontology modules dealing with the pragmatic level of the OntoLingAnnot (linguistic) annotation model.
- OntoLingAnnot's pragmatic ontology modules
 - formalise the different pragmatic units, features and relationships identified in the literature so far.
 - constitute a coherent distribution and structuring of these pragmatic elements.
- Up to date, this is the first global ontological conceptualization of linguistic annotation in general and of Pragmatics and pragmatic annotation in particular.
 - No other pragmatic model accounts globally and coherently for such a number of pragmatic concepts and/or terms.
- Hence, it is an important contribution *per se* to the areas of Ontological Engineering, Pragmatics and Linguistic Annotation.

Thank you!
